SKILLS

- Programming Languages: C#, Java, Python, JavaScript, TypeScript.
- Frameworks & Technologies: .NET, ASP.NET Core, RESTful API, Spring Boot, FastApi, NextJs
- Databases: Microsoft SQL Server, MongoDB
- Version Control & Tools: GitHub, GitLab, CI/CD, Git
- Cloud & Services: Azure, Firebase, Supabase

LANGUAGES

- English - Intermediate
- Vietnamese - Native
- Japanese - Basic

EDUCATION

Bachelor of Software Engineering
FPT University

PROFILE

Backend Developer with nearly 2 years of experience designing scalable APIs and AI-integrated systems. Proficient in ASP.NET Core, Spring Boot, FastAPI, and NestJS, with hands-on exposure to RESTful and GraphQL architectures. Experienced in building agent-based AI services, RAG pipelines, and vector database integrations. Passionate about distributed systems and backend infrastructure for AI-driven products.

WORK EXPERIENCE

HANEXT Technology Sep 2025 - APR 2026
Backend Developer

- Designed and shipped production-ready REST and GraphQL APIs across multiple client projects using Java Servlet, Spring Boot, FastAPI, and NestJS.
- Built backend services for AI features with Python FastAPI, implementing agent-based logic and integrating vector databases (QdrantDB) for retrieval-augmented generation (RAG) workflows.
- Applied both SQL (PostgreSQL) and NoSQL (MongoDB) databases according to system design requirements.
- Contributed ~30% to frontend integration using Angular and Next.js, collaborating closely with frontend teams to unblock API delivery.
- Maintained Git-based workflows, conducted code reviews, and collaborated with senior engineers on architecture decisions.

FPT Software Jan 2024 - Apr 2024
Backend Developer Intern

- Gained practical experience with Java Spring Boot by building and testing RESTful APIs for internal projects under senior supervision.
- Followed professional coding standards and version-control practices in a real enterprise environment.

ACADEMIC & PERSONAL PROJECTS

WareEase - Warehouse Management System

Backend Developer · Capstone Project · 4 months

- Architected and implemented RESTful APIs for end-to-end inventory operations, role-based access control, and permission management.
- Established CI/CD pipelines to automate build and deployment processes, reducing manual deployment overhead.

Stack: ASP.NET Core Web API, EF Core, SQL Server, JWT, CI/CD

GitHub: github.com/ware-ease/we-api

Smart Menu with AI

Backend Developer | 4 months

- Developed backend APIs and integrated AWS Rekognition to enable AI-powered image recognition features in a smart restaurant menu system.
- Managed file storage and delivery via Amazon S3 and deployed services to Azure cloud infrastructure.

Stack: ASP.NET Core Web API, SQL Server, AWS Rekognition, S3, Azure
